EXPERIENCE

Institute of Data, Remote — Assistant trainer

November 2022 - PRESENT

Support the lead trainer in delivering the learning outcomes to students as well as help students when they're stuck.

EDUCATION

Institute of Data, Remote — *Certificate*

June 2022 - October 2022

Software Engineering.

This course comprised many different skills, languages & programs. The main outcome was to be exposed to both the frontend and backend then combining the two. These are as follows:

- Databases: MySQL & MongoDB.
- Languages: JavaScript, HTML & CSS.
- Framework: ExpressJS.
- Libraries: Redis & ReactJS.
- Deployment: Docker, AWS & Github Pages.
- Required soft skills for the professional world.

CPB, Remote — *Certificate Level 5 & 7*

PROJECTS

Software Engineering Capstone — *Detail*

At the end of the aforementioned course we were tasked with creating a full stack product while documenting & presenting.

https://github.com/GWraath/originalStudyProjects/tree/main/CapstoneProject - My Capstone project.

A video of the presentation is available on request.

https://drive.google.com/file/d/1L3_2ktGBTkuduXWN1gENmoNtjCRtPPuF/view?usp=sharing - The documentation.

About me

I've worked in many different years over my worklife. I liked the idea of being the jack of all trades while not being the master of any. That's now changed - I want to master Software Engineering.

I have won the top 5 salespeople in the country, 100% mystery shopping, been the go-to nerd and wrote my own rumba scripts at Spark NZ.

I'm also known for my skills in the machine operating world.

I also had a hand in improving Westpacs morning procedures.

I am most known for being ambitious, creative, having great interpersonal skills and an exceptional attention to detail.

I am confident that we can merge and build each other upwards.

SKILLS

Helpful.

Intuitive.

Problem solver.
